

In an effort to continue providing the most up-to-date information of all the member societies of IFEA we should have an update of the information of all the member countries (new boards and email address), and request it to the country representatives at the annual general assembly in Boston.

The information from this Europe report was requested via email on the 28th of February 2012. I had information returned from the following Europe countries: Spain, Russia, Italy and France.

Please, I ask all the country representatives of Europe to send me all the reports, news, or future meetings of their societies. Thank you and have a great AAE meeting!!!.

Europe's past and future meetings:

Russia:

In recent years, Russia has seen considerable development of endodontics as a distinctive branch of dentistry. Among significant events, we can name the entry of Russia to IFEA and the ESE in 2010 and the first Russian Endodontic Congress held on 1st April 2011 at the Milan Hotel, Moscow. The Congress brought together more than 300 specialists from Moscow, Saint-Petersburg, Ekaterinburg, Kineshma, and Vladivostok, along with more than 20 sponsors, and 6 knowledge partners who took part in the exhibition and Congress organization and equipped demonstrations and workshops.

The scientific agenda was successfully fulfilled through a mixed programme, including world famous endodontists from Germany, Israel, Lithuania and Italy, along with lectures by Russian professors and young endodontic specialists, who showed their skills not only in lecturing, but also in workshop presentation.

The programme of the Congress was highly topical. Many questions of high priority were discussed, such as: developing a speciality, clinical thinking, negotiation of complex root canal anatomy, new technologies and a new generation of instruments, based on reciprocal movement.

All the interested doctors had an opportunity during the workshop not only to see and touch the new instruments, but to use them as well.

The second Russian Endodontic Congress took place from the 30th of March until the 1st of April 2012.

France:

The International Congress of the French Society of Endodontics will take place in Toulouse on the 21st, 22nd and 23rd of June. On Thursday afternoon there will be a half-day dedicated to the postgraduate (Master, PhD, other diploma...). The first part will be an original lecture (Apical length and diameter of canal preparation) by Min Kai Wu (ACTA) and the second part: poster presentations (research or clinical cases done by participants), discussion and debate. A 1000€ prize will be awarded to the best poster by an international jury (board of examiners).

On Friday there will be three specialists of CBCT: Dr. C. Hodez (Sinus and teeth relation); Dr. S. Patel (Diagnostic and prognostic in endodontics); Dr. MK Wu (Outcome in endodontics). On Saturday Dr. G. Debelian will lecture about Clinical strategies for microbial control in first treatment or retreatment, also there will be clinical presentations from members of the French Society of Endodontics and postgraduates in endodontics followed by expert session (debate on controversial subjects).
