

To IFEA BOD/AGM

IFEA research awards 2015 (to be given 2016).

2015 IFEA awards proposal				
Elbarbary Mohamed Univ. of Toronto Canada	Detection of vertical root fracture using ultrasound and magnetic resonance imaging: an Ex-vivo porcine cadaver study	Detailed res. plan, very relevant topic clinically, strong team. Weakness: no preliminary data on resolution of techniques to be used.	4.5/6	14000\$, request for 6000 USD
Jain Sameer University of Texas Health Science Center, Houston, USA	Identifying Key Targets for Apical Periodontitis Development and Progression	Interesting topic, methodology OK but not using most advanced technology (which is expensive)	4-4.5/6	5485 USD

Proposal: XXXXXXXXXXXX.If Board sets priority to divide the award, then 3000 USD both to Elbarbary Mohamed and Jain Sameer.

Vancouver, May 31, 2016 Markus Haapasalo
